FREE ON-SITE QUOTES AVAILABLE.

**6M X 4M 2.4M HIGH
SINGLE GARAGE**

The entry level SmartSteel Garage offers great value and practicality but with all the attributes that make SmartSteel the smart choice.

**6M X 6M 2.4M HIGH
DOUBLE GARAGE**

This SmartSteel double garage offers extra drive-in space for a boat, second car or the kids bikes.

**7M X 6M 2.4M HIGH
DOUBLE GARAGE**

This design provides added area for the addition of a workbench, room for gardening equipment or for more storage space.

**9M X 6M 2.4M HIGH
TRIPLE GARAGE**

The 9m x 6m design combines all the features and the options of the SmartSteel range with all the space you'll ever need in a garage.

SMART PURCHASE!

The SmartSteel range of garages is especially designed to be super-affordable - but that doesn't mean anything's been compromised. SmartSteel garages are strong and stylish, with all the built-in quality you would expect from Totalspan - and every garage is backed by our 25-year full structural guarantee.

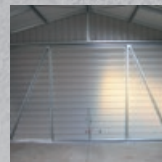

SMART LOOKING!

The unique steel cladding is not just incredibly strong - it also offers a sleek, clean look. The cladding is available in zinc aluminium - coated steel or in any of the fashionable colours featured in the SmartSteel colour chart.

DEMAND THE STRENGTH OF STEEL

Every SmartSteel garage gives you the incomparable advantages of a construction process that uses all steel and nothing but steel. Steel stays true - it won't bend, warp or rot like timber can. And what's more - timber and nail construction is no match for the strength of steel brackets.

Sleek, clean lines with plenty of internal space.

Unsurpassed strength of steel.

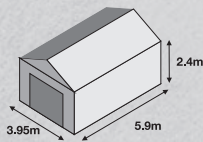

Optional skylight.

WITH OUR WIDE RANGE OF GARAGES WE'VE GOT THE PERFECT ONE FOR YOU
